### **Current Research Interests**

Professional and applied ethics incl. police ethics, business ethics, computer ethics, and ethics of political violence. Philosophy of action (social action).

### **Current Grants**

2008-11 ARC Linkage Grant 'Corporate Governance, Regulation and Accountability'. S Miller; J. O'Brien; C. Sampford; A. Macintyre. Funding: \$400,000

*Project Summary:* The research concerns the embedding of institutional integrity in multinationals operating in emerging markets - India and China, in particular. It is to examine how existing corporate and wider industry designed protocols can be operationalised given the cultural, political and economic dynamics in each market.

2000-2008 Australian Research Council funded Special Research Centre Scheme, Centre for Applied Philosophy and Public Ethics (named by ARC as Director). \$8,000,000

2005-9 ARC Linkage Grant 'An Integrity System for Victoria Police'. S Miller; J Kleinig; T Prenzler; A Alexandra; C Nixon; G Chilvers; S James; D Bradley. Funding: \$750,000

*Project Summary:* Through a critical examination of current integrity systems and sub-systems across a range of police forces, in depth empirical explorations at the primary research site (VicPol) and analyses of practical ethical problems, a high performance integrity system will be designed and tested. The significance of this project is its comprehensiveness, its use of a reliable theory of organisational ethical health, and of a methodology that allows for the full incorporation of practitioner views. Outcomes of the project will include data generating arrangements that provide evidence of achieved levels of compliance, integrity and performance.

2007-8 National Science Foundation Project 'Security and Privacy: Global Standards for Ethical Identity Management in Contemporary Liberal Democratic Societies' J Kleinig; A Schwartz; D Salane; P Mamei; S Miller. Funding: \$234, 000

*Project Summary:* This project is principally concerned with the analysis of the ethical dimensions of identity management technology, eg. electronic surveillance, data base integration and profiling, in the context of international crime and global terrorism. The reconciliation of the two basic values in conflict, namely security and privacy, in the form of a framework of global ethical standards, can be deployed in the design of specific institutional mechanisms and identity management tools. This project will be based at John Jay as part of a three-pronged investigation, with centers in Australia and the European Union.

2007-9: Springer Press (Germany), The Ethics Reference Project in Applied Ethics, (Joint Editor-in-Chief). Funding: \$80,000

2006-8: WorkCover NSW, Applied Research Project, Police Stress, (Industry Partner, NSW Police Association), (Principal Researcher with Greg Chilvers). Funding: \$150,000
